

Description

The Night Birds family has been expanded with a new interior light called Night Birds MINI. This smaller sibling makes the ideal complement to the full-sized lights and is perfect for smaller spaces where larger flocks would appear cramped. Suspended from elegant coaxial cables, MINIs are perfect for illuminating intimate dining areas and conference tables.

Tech. description

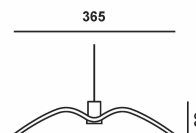

The bottom section of the light comprises a dural fixture and an integrated LED module with optical element. Hung on the fixture is a piece of fused glass bent into the silhouette of a bird in flight. The bottom section of the light is suspended on a coaxial cable extending from a ceiling canopy, which houses the electronics.
