### CLEANING THE GLASS

**BROKIS upholds only the highest possible quality standards. Prior to shipping, the light undergoes several quality controls and stages of cleaning. Because transportation, storage, and the amount of time that passes between packing at our plant and subsequent unpacking by the client can affect the light in different ways, we strongly recommend cleaning it prior to assembly.**

**The glass must first be rinsed in warm water, and a dish detergent may be used to remove all foreign particles, dust, and grease. Repeat the process if necessary and then dry the glass thoroughly with a paper towel.**

**Recommendation: Do not use mineral spirits, highly concentrated thinners, or other substances not intended for use on glass surfaces. Do not use any cleaning agents containing silicone, as they may leave a film and attract dust and smudges.**

**PRIOR TO SHIPPING, THE FUNCTIONALITY OF EACH LIGHT AND ITS COMPONENTS IS CHECKED THOROUGHLY. THE MANUFACTURER ASSUMES NO LIABILITY FOR THE MISHANDLING OF PRODUCTS.**

## 1. SWITCHING ON THE LIGHT 1/2

Place the light on an even, stable surface and plug the power cable into an electrical outlet.

## 2. SWITCHING ON THE LIGHT 2/2

Slide the switch to the ON position and ensure the light works properly.

### 3. DIMMING THE LIGHT

Turn the large knob to decrease or increase the brightness of the light.

Turn the small knob to change the direction of the light: UP / UP & DOWN / DOWN.

These functions work only when the switch is in the ON position.
